PROFILE

Full-Stack TypeScript Developer with 3+ years of experience building scalable web applications and real-time systems using TypeScript, React.js, Next.js, Node.js, and NestJS. Experienced in designing maintainable backend architectures, secure REST APIs, WebSocket systems, CI/CD pipelines, and cloud deployments. Strong focus on performance optimization, clean code practices, and scalable engineering workflows across distributed teams.

EDUCATION

Mahendra Morang Adarsha Multiple Campus (Tribhuvan University)

Biratnagar, Nepal

Bachelor of Computer Applications

2022 – 2026

SKILLS

Technical:

Language: TypeScript, JavaScript, SQL, Java

Frontend: React.js, Next.js, Redux, Zustand, Tailwind CSS, Material UI, Shadcn/UI

Backend: Node.js, Express.js, NestJS, REST APIs, WebSockets, JWT, OAuth, MVC Architecture

Database: MongoDB, PostgreSQL, Prisma, Redis

Cloud & DevOps: Docker, GitHub Actions, CI/CD, AWS S3, AWS IAM, VPS Deployment, Linux

Tools & Others: Git, GitHub, Swagger, Postman, Figma, Responsive Design, API Integration

EXPERIENCE

Axor Technology

Kathmandu, Nepal

Full Stack Developer

Sep 2024 – Sep 2025

- Developed and maintained scalable full-stack TypeScript applications using React.js, Next.js, Node.js, Express.js, and MongoDB across eCommerce, education, and consultancy platforms.
- Designed and implemented secure REST APIs, authentication systems, authorization workflows, and modular backend architectures for production applications.
- Built responsive and SEO-optimized frontend interfaces using React.js, Next.js, Tailwind CSS, and TypeScript with SSR and route optimization techniques.
- Implemented Dockerized development environments and contributed to CI/CD deployment workflows using GitHub Actions and VPS/cloud infrastructure.
- Optimized application performance, API response times, and frontend rendering to improve scalability and user experience.
- Collaborated with cross-functional teams including designers, QA engineers, and stakeholders in an agile development environment.
- Participated in code reviews, architecture discussions, and technical planning while mentoring junior developers on scalable engineering practices.
- Wrote technical documentation for APIs, deployment workflows, and project architecture to improve maintainability and team collaboration.

Infoclick Digital Solutions

Biratnagar, Nepal

Frontend Developer

Dec 2023 - Jul 2024

- Developed responsive TypeScript-based frontend applications using React.js, Redux, and Tailwind CSS for AI-powered and content-driven platforms.
- Integrated REST APIs and implemented scalable frontend state management workflows for dynamic user experiences.
- Collaborated with backend developers and designers to build reusable UI components, dashboards, forms, and navigation systems.
- Contributed to an AI image-generation platform by implementing performant frontend interfaces and API integrations.
- Improved frontend maintainability through reusable component architecture and consistent UI development practices.

PROJECTS

Travel Log App (Live)

- Built a full-stack travel discussion platform using React.js, Node.js, Express.js, and MongoDB.
- Designed scalable REST APIs for authentication, posts, discussions, and user interaction workflows using MVC architecture.
- Implemented JWT-based authentication, protected routes, and optimized database queries for improved backend performance.
- Developed responsive frontend interfaces and reusable API integration patterns for efficient frontend-backend communication.

MCraft Nepal (Live)

- Developed and maintained a scalable eCommerce platform using Next.js and Django REST Framework (DRF).
- Built TypeScript-based frontend architecture using SSR, cache components, and instant route revalidation for improved performance.
- Integrated REST APIs for authentication, products, and order management workflows between frontend and backend systems.
- Managed VPS deployment workflows using Coolify, Docker, and Traefik reverse proxy configuration.
- Optimized application routing, rendering strategies, and frontend performance for faster page loads and improved scalability.
- Collaborated on frontend architecture, deployment infrastructure, and full-stack feature implementation in a live production environment.

Chat Application (Live)

- Developed a real-time chat application using React.js, Node.js, Express.js, MongoDB, and WebSocket-based communication.
- Implemented scalable real-time messaging features for individual and group chats with optimized backend event handling.
- Designed REST APIs for authentication, media sharing, user management, and chat workflows.
- Built responsive frontend interfaces with React.js and Material UI while ensuring smooth real-time synchronization.
- Optimized WebSocket communication and backend architecture for reliable real-time interactions.

Realtime Complaint Tracking (Live)

- Built a real-time complaint tracking platform using React.js, TypeScript, NestJS, PostgreSQL, and Redis.
- Designed a modular and scalable NestJS backend architecture for maintainable feature development and API organization.
- Implemented WebSocket-based real-time updates to instantly synchronize complaint status changes across clients.
- Developed secure REST APIs and integrated frontend-backend workflows for complaint management operations.

- Used Redis caching and PostgreSQL optimization techniques to improve API performance and reduce response times.
- Built reusable React components and scalable frontend state management patterns for responsive user interfaces.
